To

Doctor Hugues Ghislain ATAKLA

Dear Colleague,

Following your correspondence requesting registration for the Special Studies Diploma in Neurosurgery in Dakar, I am pleased to inform you that it has been accepted by the committee Pedagogical of DES. I congratulate you.

The exact duration of studies sanctioned by an annual examination is still four (04) years. However, a one-year internship is planned in a European country, subject to availability. This therefore brings the total number of years of training to five (05) years.

Tuition fees are as follows:

- Schooling : 500,000 Frs/year
- Administrative registration : 150,000 Frs/year

There are other possible tasks related to the writing of the dissertation, or the participation in various scientific meetings.

Of course, these various costs do not take into account the student's cost of living (housing, transport, food, etc.).

You can therefore enroll in the first year of DES now. The start of the school year is scheduled for January 04, 2022

Please accept, dear Colleague, the assurance of my highest consideration.
